

CPU: Istio vs Mazu at replica scale 16x (96 sidecars) benchmark1.5b-replica-scale-09-05-26_195041

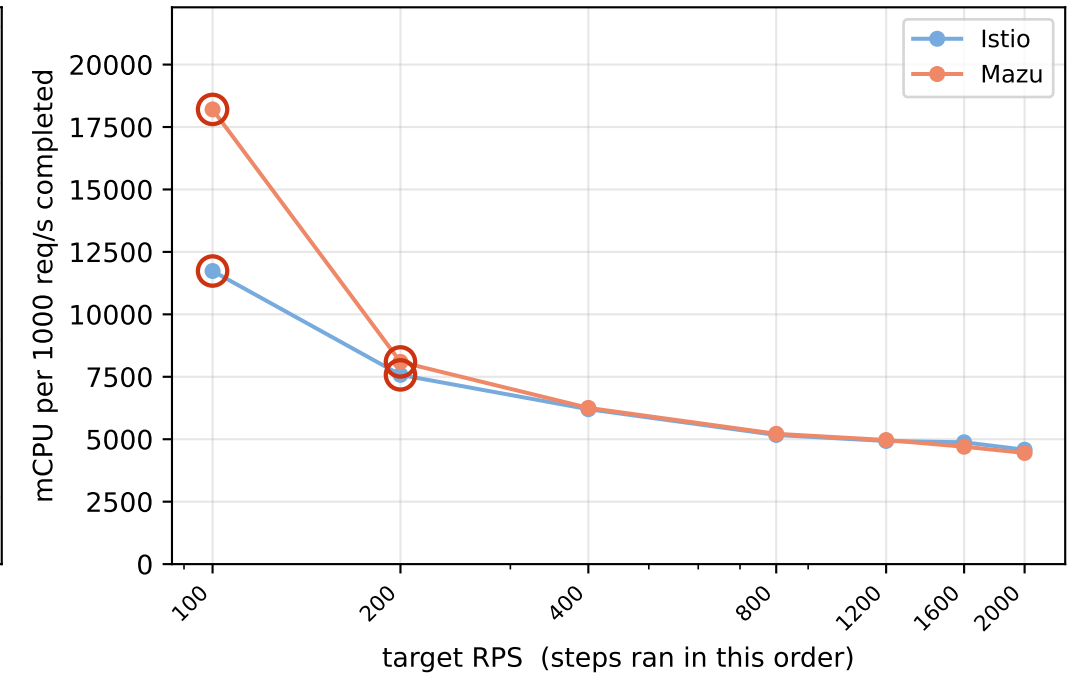

Total mesh CPU
(istio-proxy sidecars + istiod)

Where it goes, by component
(colour = mesh, as panel 1)

Cost per unit of delivered load
(flat = replication is free; rising = it is not)

app containers are not measured by collect_metrics.sh (container="istio-proxy" only) | red ring: >=1% of offered load never completed at that step
